Polyethylene tandem kayaks – comfort and safety

At **eKajaki.pl**, we focus on kayaks that offer real comfort on the water, a high level of safety and confident handling on different types of rivers. That is why our fleet includes only **durable HDPE polyethylene tandem kayaks**, tested on day trips, family paddling trips, weekend outings and multi-day river adventures.

We currently offer **3 tandem kayaks**, carefully selected so that everyone can choose the model best suited to the planned route, paddling style and amount of luggage: **Caymann 380**, **Solina 480** and **Dag Freeland 470**. This range allows you to choose the right kayak both for calm family trips and for more technical, winding and obstacle-filled sections of river.

Why choose our tandem kayaks?

- made from durable and impact-resistant **HDPE polyethylene**,
- stable and safe even for less experienced paddlers,
- comfortable for short outings, family paddling and longer river trips,
- perform well on lowland rivers, meandering waterways and sections with obstacles,
- allow you to choose the right kayak for your paddling style – from maximum storage capacity to maximum maneuverability.

1. Polyethylene tandem kayak Caymann 380

Caymann 380 is an excellent choice for paddlers who value **maneuverability, easy handling and full control of the kayak**. This model performs especially well on **winding rivers, obstacle-filled sections and more technical routes**, where quick reaction, efficient line choice and confident control are essential.

It is an ideal kayak for **day trips**, when light handling, comfort and easy maneuvering matter most. It also works very well on **multi-day trips without heavy luggage**, when you want a more dynamic paddling experience and the freedom to deal with bends, narrow passages and natural river obstacles with ease.

The **Caymann 380** is also a great option for paddlers who enjoy going **solo in a tandem kayak**. In this setup, you gain **more cargo space**, more room around you and **greater stability than in a classic single kayak**. This is a very practical solution for paddlers who want to travel alone while still enjoying comfort, security and extra room for equipment.

Despite its compact length, the Caymann offers a spacious cockpit area, comfortable seats, high sides and stable behavior on the water. It is a very good choice for paddlers who want to feel more connected to the river while still keeping a high level of comfort and safety throughout the trip.

Key advantages of the Caymann 380:

- very good maneuverability and handling,
- ideal for winding rivers and technical sections,
- excellent for day trips,
- a good option for multi-day trips without heavy luggage,
- comfortable choice for solo paddling in a tandem kayak,
- more stability than a classic single kayak,
- generous storage space behind the rear seat,
- large cockpit area and high seating comfort,
- high sides improve safety on the water.

Technical data:

- length: **380 cm**
- width: **82 cm**
- weight: **34 kg**
- maximum load capacity: **240 kg**
- sealed storage hatch: **no**
- footrests: **fixed – saw-tooth type**
- material: **HDPE polyethylene**

2. Polyethylene tandem kayak Solina 480

Solina 480 is a great choice for paddlers looking for a highly versatile tandem kayak. This model works well both on **day trips** and on **multi-day journeys with more luggage**. Thanks to its longer hull, high carrying capacity and stable handling, it gives a strong sense of confidence on the water while still offering the comfort needed for relaxed family paddling.

It is a very good kayak for couples, families with a child and paddlers who value **calm, predictable handling**, solid tracking and generous storage space. Solina tracks well, does not feel overly twitchy, moves smoothly through the water and stands out for its high stability. Another major advantage is the option to configure it with room for a child, making it especially attractive for family river trips.

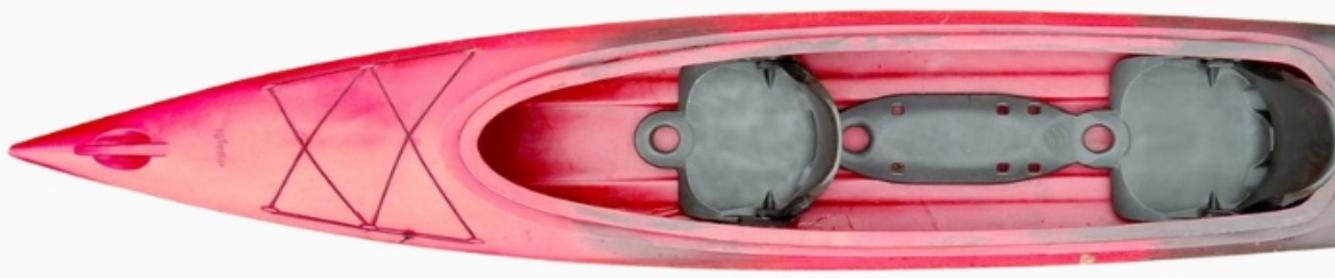

Key advantages of the Solina 480:

- versatile kayak for day trips and multi-day journeys,
- very high stability and a strong sense of safety on the water,
- tracks straight and confidently,
- higher sides increase comfort and help reduce water splashing into the boat,
- possible family layout in a 2+1 configuration,
- high carrying capacity for trips with luggage,
- made from durable **HDPE**.

Technical data:

- length: **480 cm**
- width: **82 cm**
- maximum height: **37 cm**
- weight: **42 kg**

- capacity: **340 kg**
- storage hatch: **100 l**
- footrests: **YES (saw-tooth type)**
- material: **HDPE**

3. Polyethylene tandem kayak Dag Freeland 470

Dag Freeland 470 is a comfortable touring kayak for paddlers who want to combine **paddling comfort**, generous interior space and excellent practicality on Polish rivers. The open cockpit, comfortable seats, good maneuverability and high durability make it a popular choice both for shorter outings and for longer river trips.

Its strong point is **storage capacity** along with practical touring features: a storage compartment, the ability to carry more equipment and the option to install an additional child backrest. It is a kayak that also performs well on rivers with obstacles, where smooth maneuvering and confident handling are important.

Key advantages of the Dag Freeland 470:

- very comfortable touring kayak,
- large storage capacity for longer trips,
- works well on shorter routes too,
- open and spacious cockpit,
- good maneuverability and safe handling,
- possible installation of an additional child backrest,
- storage hatch with a capacity of **90 l**.

Technical data:

- length: **470 cm**
- width: **78 cm**
- height: **41 cm**
- weight: **38 kg**
- maximum load capacity: **290 kg**
- storage hatch: **90 l**
- footrests: **YES (saw-tooth type)**
- material: **HDPE polyethylene**
