

Polyethylene canoes

Our equipment does not tolerate compromises – on our offer you will find not only polyester kayaks and canoes but also very safe and comfortable equipment making use of the latest polyethylene technology. We focused on the quality of our equipment and the safety of our customers !! The customer has to trust us and feel safe while canoeing – that is most crucial from our perspective. Our equipment comes from the best companies in the kayaking industry, we do not provide the so-called “garage makes”. Check out our equipment and compare with others !! We are not afraid of comparisons, we respect our competitors !!

POLYETHYLENE CANOE: BOREAL BOHEME 460

The classic model of a three person canoe by renowned French company Boreal. This model has a very robust design. It is very stable and easy to control and its large displacement ensures safe movement of the whole family. Perfect for rivers, lakes, canals. The open cockpit version makes it possible to load large amounts of luggage. Three profiled seats provide comfort of canoeing. It is the optimal choice for a reasonable price. Wide bottom offers more stability while canoeing.

And below the most important features:

- material: polyethylene, the latest development in the production of kayaks, super strong, not afraid of challenging routes, safe and secure, and most importantly: it does not sink !!
- cockpit: wide, comfortable, providing much comfort on the route
- seat: comfortable, profiled, do not make people tired while paddling, even after few hours you will not feel the effects of sitting
- in the middle seat two caps locking caps for chambers for valuables and everything that we want to have at hand
- special handles on the bow and stern for carrying kayaks easily
- wide bottom offers a sense of stability during canoeing
- high capacity thanks to the open cockpit version

Specifications:

- length: 4,60m
- width: 95 cm
- weight 37 kg
